**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15 and 26-40, drawn to device, classified in class 257, subclass 302.
  - II. Claims 16-25 and 41-47, drawn to method, classified in class 438, subclass 242.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device of claim 1 and device of claim 16 is materially different, such as the device of claim 16 does not have the gate semiconductor portion with a plurality of projections extending in a direction from the third region toward the fourth region.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

2. In addition, if the method or the device is elected, applicant is further required to elect a species of:

Embodiment 1 of Fig. 1A.	Embodiment 15 of Fig. 27.
Embodiment 2 of Fig. 6B.	Embodiment 16 of Fig. 30.
Embodiment 3 of Fig. 8.	Embodiment 17 of Fig. 34C.
Embodiment 4 of Fig. 9.	Embodiment 18 of Fig. 35.
Embodiment 5 of Fig. 10.	Embodiment 19 of Fig. 36.
Embodiment 6 of Fig. 12.	Embodiment 20 of Fig. 38.
Embodiment 7 of Fig. 13A.	Embodiment 21 of Fig. 39.
Embodiment 8 of Fig. 18A.	Embodiment 22 of Fig. 40B.
Embodiment 9 of Fig. 19A.	Embodiment 23 of Fig. 41.
Embodiment 10 of Fig. 20B.	Embodiment 24 of Fig. 42B.
Embodiment 11 of Fig. 22B.	Embodiment 25 of Fig. 43B.
Embodiment 12 of Fig. 23.	Embodiment 26 of Fig. 44.
Embodiment 13 of Fig. 25.	Embodiment 27 of Fig. 46.
Embodiment 14 of Fig. 26.	

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
